## ***City of San Antonio names new Senior Engineer***

Andrew W. Slavens, P.E., has been promoted to Senior Engineer for the City of San Antonio's Capital Improvements Management Services (CIMS) Department.

Slavens, a City of San Antonio employee for three years, will oversee the utility coordinators; facilitate utility coordination meetings; manage the Scheduling, Staff Augmentation and Alternative Delivery Method Program Management contracts (monitor the program status and provide weekly and monthly reports); interact with and provide guidance to the project managers assigned to the horizontal component; assist each manager with design and project challenges; and serve as the Local Agency Management (MPO-funded projects) coordinator for CIMS, among other duties.

The Indiana native received a Bachelor of Science in Civil Engineering from Valparaiso University. Slavens' experience includes serving as Assistant City Engineer for Crawfordsville, Ind.; Engineering Director for the Abijah Group; Director of Surveying Services for GE Reaves Engineering Inc.; and Project Manager for Rosin-Johnson Inc.

San Antonio City Council approved the creation of CIMS in 2007 to manage the City's Capital Improvement Program projects, which include the 2007-2012 Bond Program through all phases of design, construction, and inspection. CIMS also coordinates the consultant selection, construction contractor procurement, and project delivery for all capital improvement construction projects.
